- Conclusion

Curriculum

- A course of study that will enable the learner to acquire specific knowledge and skills
- A curriculum is the combination of instructional practices, learning experiences, and students' performance assessment that are designed to bring out and evaluate the target learning outcomes of a particular course
- Curriculum is what the school is attempting to teach, which might include social behaviors as well as content and thinking skills
- A selection of information, segregated into disciplines and courses, typically designed to achieve a specific educational objective
- The curriculum is the program of instruction. It should be based on both standards and best practice research. It should be the framework that teachers use to plan instruction for their students
- Curriculum can be both written and unwritten

C. Structure of Undergraduate Engineering program :

S. No.		Credit Breakup for CSE students
1	Humanities and Social Sciences including Management courses	12
2	Basic Science courses	24
3	Engineering Science courses including workshop, drawing, basics of electrical/mechanical/computer etc	29
4	Professional core courses	49
5	Professional Elective courses relevant to chosen specialization/branch	18
6	Open subjects – Electives from other technical and /or emerging subjects	12
7	Project work, seminar and internship in industry or elsewhere	15
8	Mandatory Courses [Environmental Sciences, Induction Program, Indian Constitution, Essence of Indian Traditional Knowledge]	(non-credit)
	Total	159*

Minor variation is allowed as per need of the respective disciplines.

Course Code	:	COPC210
Course Title	:	Web Technologies
Number of Credits	:	2 (L: 2, T: 0, P: 0)
Prerequisites	:	-
Course Category	:	PC

Course Learning Objectives:

To provide basic skills on tools, languages and technologies related to website development. Learnings from this course may be used in the Mini Project and summer internship.

Course Content:

UNIT 1: Introduction to www

Protocols and programs, secure connections, application and development tools, the web browser,

What is server, setting up UNIX and LINUX web servers, Logging users, dynamic IP Web Design: Web site design principles, planning the site and navigation

UNIT 2: Web Systems Architecture

Architecture of Web based systems- client/server (2-tier) architecture, 3-Tier architecture, Building blocks of fast and scalable data access Concepts - Caches-Proxies- Indexes-Load Balancers- Queues, Web Application architecture (WAA)

UNIT 3: Javascript

Client side scripting, What is Javascript, simple Javascript, variables, functions,conditions, loops and repetition

UNIT 4: Advance scripting

Javascript and objects, Javascript own objects, DOM and web browser environments, forms and validations

DHTML: Combining HTML, CSS and Javascript, eventsand buttons, controlling your browser,

Ajax: Introduction advantages & disadvantages,ajax based web application, alternatives of ajax

XML, XSL and XSLT: Introduction to XML, uses of XML, simple XML,XML keycomponents, DTD and Schemas, XML with application, XSL and XSLT.

Introduction to Web Services

UNIT 5: PHP

server side scripting, Arrays, function andforms,advance PHP Databases :Basic command with PHP examples, Connection to server,creating database, selecting a database, listing database, listing tablenames creating a table, inserting data,altering tables, queries, deletingdatabase, deleting data and tables, PHP myadmin and database bugs.

○ We at NetXs Solutions,Ahmedabad have URGENT job opening for "Jr.
○ .NET Developer" and looking for a person having knowledge &

Front End Developer

talentbag - Mumbai, Maharashtra

Full-time, Fresher - Temporarily remote

⚡ Responded to 75% or more applications in the past 30 days, typically within 2 days.

Apply Now   ♡

The ideal candidate will be responsible for designing, developing, testing, and debugging responsive web and mobile applications for the company. Using HTML and CSS, this candidate will be able to translate user and business needs into functional frontend design.

Responsibilities

- Designing & developing UI for web & mobile applications
- Build reusable code and libraries for future use
- Ability to convert comprehensive layout and wireframes into working HTML pages.
- Accurately translate user and business needs into functional frontend code

Qualifications

- Familiarity using Scrum/Agile development methodologies
- Fresher or less than 2 years of experience in frontend development
- Good understanding of front-end technologies including HTML, CSS(flex), JavaScript, jQuery & Bootstrap framework

PHP Web Developer

Web Developer

Radi8 Labs - Kochi, Kerala

Full-time, Contract, Fresher - Remote

Apply Now ♡

What you'll be doing:

- Building rich, interactive web applications in a greenfield environment
- Building API's and developing micro-services
- Designing new features
- CI/CD

What you'll need:

- 2 years of experience building web applications
- Programming in Python, PHP, Go, Java or other functional programming languages
- Knowledge of HTML, CSS, Javascript, Bootstrap & Material UI
- Strong computer science fundamentals and a love for design
- Quick learner & Result driven
- Good communication and a love for travel and problem solving

Nice to have:

- Github account with some cool projects
- React, Angular, Vue or Webpack
- Experience on consumer facing applications
- Agile, DevOps methodology

Job Types: Full-time, Contract, Fresher

Experience:

- web development: 2 years (Preferred)

Text Summarization

Shortening long pieces of text by applying computational methods

1. • Create a dataset of job postings

2. • Remove unwanted stop words, numbers, punctuation marks, unrelated words

3. • Tokenize words and sentences.

4. • Compute word frequency [n-gram analysis] and sentence score.

5. • Select sentences with high scores and concatenate them

6. • Sort the words in descending order of frequency (highest first)

7. • Extract the top-n words/ word combinations from the previous step and compare them with the Syllabus of particular subject

8. • Refine the syllabus of existing subject with new keywords.
   • Propose a new subject

Conclusion

- To achieve better results using natural language processing one of the important factor is preprocessing of document

- Using pointer generator network we can balance the advantages / disadvantages of extractive / abstractive summarization to get the better results

- Need to experiment with non professional courses and with other than English language such as indic languages
